Welcome to Spring and goodbye to the snow (hopefully).

There are only two months until K4H '18 with this year's event looking like it will take us past a significant milestone exceeding £100,000 raised for various charities since our very first event in 2001. It is down to you guys, our supporters who have made this possible through your support and generosity over the years.

So on behalf of HYDRAQUIP and all of those that the money raised has helped –
THANK YOU VERY MUCH.

K4H may not be the biggest fundraiser for Help for Heroes. However the money we raise is truly appreciated and for any of you who have met any of the many servicemen and women who have participated over the years you will appreciate the difference H4H has made to their lives.

Since the running the first K4H the military has had a presence in one way or another at every event with the last few years seeing teams from Mission Motorsport, a charity that helps rehabilitation through motorsport, participating in the racing. Off track the MM guys have given us some poignant moments with their own personal stories about their injuries and rehabilitation. Over the years we have heard how the support of H4H & MM has got guys back from very dark places and taken them forward in many ways. We have witnessed an ex-serviceman pass his prosthetic leg around a very subdued room. We heard how a serviceman's job was to collect the parts of fallen comrades. We have witnessed the passion of their drivers along with a gentle hint of rivalry between their teams. But most of all we saw the massive smiles and listened to the laughter coming from these guys as they enjoyed the karting.

Listening to and meeting these guys brings home exactly why we run the event and why we have chosen to support Help for Heroes. Karting for Heroes events may not be the final solution for these guys, nor will the money we raise cover all that is needed for their recovery, but it does make a difference and is our way of saying Thank You for putting us and our country before their own safety.

If you can, please join us on the 12th May with your own team or just come along to support us.
